Description of surface location: This site is the first point east of potato harbor. The transect runs parallel to the island. There is a cave that lines up with the 50 meter mark.

Description of bottom topography: The zero end starts right at the beginning of a bedrock reef with sand to the east. The west end of the transect runs into the island. There are large caves and ledges at this site creating a very rugose habitat.

Location of the temperature unit: Near the 0 meter mark at the east end, depth 36 feet.
