Description of surface location: North to south transect that runs parallel to the point at East Fish Camp.

Description of bottom topography: The moderate rugosity at this site is formed by the intermittent sand channels and canyons that intersect it. Off both the north and south ends of the transect are large sandy plains and another sand channel runs east –west across the transect between the 30 to 35 meter mark.

Location of temperature unit: Near the 0 meter mark at the north end, depth 36 feet.
